

Aviation Project Profile

Asheville Regional Airport Authority Multi-User Flight Information Display System

Client Profile:

The Asheville Regional Airport, serving western North Carolina and northwestern South Carolina, is one of the fastest growing regional airports in the United States. Served by the commercial carriers Continental Airlines, Delta Air Lines, Northwest Airlines, and US Airways, travelers can reach any destination in the world from the Asheville Regional Airport. A recent \$20 million investment in equipment, gate expansions, a high-tech business center, color, lighting, and landscaping have truly made the Asheville Regional Airport a state-of-the-art facility that exceeds traveler's expectations, providing a relaxed and pleasant travel experience.

Project Description:

SDG developed the functional and technical specifications and procurement documents for a new multi-user flight information display system (MUFIDS) that includes LCD panels with arrival and departure information as well as real-time flight tracking and airport advertising.

Project Timeframe:

SDG's planning and design work was performed in the summer of 2005 and the new MUFIDS was installed in the fall of 2005.
