Metropolitan Washington Airports Authority selects CapitalVision®

Washington, D.C. – January 11, 2011 — The Solution Design Group, Inc. (SDG) announced today that the Metropolitan Washington Airports Authority (MWAA) had joined its diverse group of government and transportation customers that subscribe to the CapitalVision® service.

“We are extremely pleased to add MWAA to our growing list of CapitalVision® clients,” stated Tom Strange, President and CEO of SDG. “The Authority is a very progressive organization with a highly respected financial management team and we are happy to add them to our growing customer base of airports, local governments, and universities. We are honored that they have selected CapitalVision® to assist with the management of their bond funds and capitalized interest allocations.”

CapitalVision®, which is available on a subscription basis or in an enterprise version, is a unique software solution that manages the relationships between capital program funding sources, projects, assets and associated contracts. It is designed specifically to allow the owner or operator to have immediate access to project expenditures on a funding source by funding source basis. It bridges the gap between the typical project management systems and financial accounting and ERP systems and provides the reports needed by funding providers such as the FAA.

The Metropolitan Washington Airports Authority owns and operates Ronald Reagan Washington National Airport and Washington Dulles International Airport. The Airports Authority is responsible for capital improvements at both airports and also manages and operates the Dulles Toll Road. The Airports Authority is also managing the project to extend Metrorail from the existing Orange line to Dulles Airport and into Loudoun County, Virginia.

About The Solution Design Group, Inc. (SDG)

SDG is a software developer and information technology consulting firm that focuses on capital program management for the aviation, transportation and government markets. The principals of SDG have over 75 years of collective experience in the aviation industry and have provided software or services for nearly 100 different airports around the world. SDG's offices are in the Washington, DC area and in Orlando, Florida.
