Southwest Florida International Airport selects CapitalVision®

Fort Myers, Florida June 30th, 2008 — The Solution Design Group, Inc. (SDG) announced today that its CapitalVision® software subscription service, used by airport managers and consultants to manage capital programs for airports, is currently being implemented for the Lee County Port Authority (LCPA) at Southwest Florida International Airport.

“We are thrilled to have RSW as one of key users of CapitalVision®,” stated Tom Strange, President and CEO of SDG. “The Lee County Port Authority has a large capital program underway and we are very pleased that CapitalVision® will be used to help with the financial management of the program.”

Brian McGonagle, Finance Department Director for LCPA, stated that CapitalVision® will allow the Authority to streamline its financial management process of the capital improvement program and allow for more efficient tracking of different funding sources as well as improve reporting to Authority management.

CapitalVision®, which is available on a subscription basis or in an enterprise version, is a unique software solution that manages the relationships between capital program funding sources, projects, and associated contracts. It is designed specifically to allow the owner or operator to have immediate access to project expenditures on a funding source by funding source basis. It bridges the gap between the typical project management systems and financial accounting and ERP systems and provides the reports needed by funding providers such as the FAA.

The Lee County Port Authority operates Southwest Florida International Airport and Page Field General Aviation Airport in Lee County, Florida. Southwest Florida International Airport (RSW) was certified for operation in May 1983. RSW served more than 8 million passengers in 2007 and ranks among the 50 busiest airports in the nation. For more information, visit www.flylcpa.com.

About The Solution Design Group, Inc. (SDG)

SDG is a software developer and information technology consulting firm that focuses on capital program management for the aviation and transportation market.
