CapitalVision® Supports American Recovery and Reinvestment Act Required Reporting and Helps Airports meet Transparency and Oversight Requirements

Orlando, FL, March 12, 2009 — The Solution Design Group, Inc. (SDG) announced today that its CapitalVision® solution, used by airport managers and consultants to manage capital programs for airports, supports the reporting required under the American Recovery and Reinvestment Act (ARRA) of 2009.

“The Federal Aviation Administration just released the “Stakeholder Guidance” document that outlines the information that is required to be reported to the federal government regarding how stimulus funds will be used by airport sponsors. We are pleased to report that CapitalVision® supports these new regulatory reporting requirements with its current release.” said Tom Strange, President and CEO of SDG.

On February 17th, 2009, President Obama signed Public Law 111-5. The legislation, referred to as the American Recovery and Reinvestment Act of 2009 provides the US Department of Transportation with \$48.1 billion for infrastructure development. Of this, \$1.1 billion is provided to the FAA from the General Fund for airport related purposes. Section 1511 and Section 1201(c) include specific reporting requirements on how federal funds are being used.

CapitalVision®, which is available on a subscription basis or in an enterprise version, is a unique web-based service that manages the relationships between capital program funding sources, projects, and associated contracts. It is designed specifically to allow the owner or operator to have immediate access to project expenditures on a funding source by funding source basis. It bridges the gap between the typical project management systems and financial accounting and ERP systems and provides the reports needed by funding providers such as the FAA.

About The Solution Design Group, Inc. (SDG)

SDG is a software developer and information technology consulting firm that focuses on capital program management for the aviation and transportation market. The principals of SDG have over 75 years of collective experience in the aviation industry and have provided software or services for nearly 100 different airports around the world. SDG's offices are in the Washington, DC area and in Orlando, Florida.
